Ok,

I will check in with folks at our end and get back to you with possible dates.

Matt

Matt, I don't know if we have specific questions. I think a first step is to sit down with the solid waste folks to go over what we are thinking (i.e., using treated sediments as fill material for certain construction projects) and understanding what requirements might apply.

Eric

	DEQ Solid Waste Program Contact

Chip and Eric,

Last week at the TCT, EPA requested specifics as to DEQ requirements for upland management of treated contaminated sediment from future Portland Harbor remediation projects. The general DEQ requirements would be incorporated into the Portland Harbor Feasibility Study.

If you can provide example questions or scenarios, I will be happy to coordinate with the DEQ Solid Waste Program and get back to you. Alternatively, if you want to schedule a meeting with DEQ to walk through the DEQ process, let me know and I will set it up.
